

Co-Flex[®] LF

latexfree
PRODUCT

U.S. Patent No. 6.156.424

Traditional Non-Woven Latex-Free Bandage

- More economical than Coban[®] LF
- Patented LF cohesive technology
- Controlled compression - will not constrict
- Adheres to itself; no clips or fasteners needed
- Sweat & water resistant

Clinical Advantages of CoFlex[®] LF:

CoFlex LF will not constrict – Coban[®] LF tends to constrict over time. All CoFlex products provide consistent/controlled compression.

Consistent/Controlled Compression:

Consistent/controlled compression is important in delivering an equal flow of blood which reduces the risk of a blood clot. Additionally, consistent/controlled compression reduces the risk of pressure points that can precipitate hematomas.
